DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Regarding Claim 1, in Lines 2-3 it is unclear what is meant by "a screw which is formed on its inner surface to be engaged with a screw which is formed on an outer surface". When the applicant mentions a screw is formed on *its* inner surface, what is *its* referring to? Is it referring back to the cap or the screw itself? While Applicant argues that they are referring to a screw thread being on the cap, it is unclear in the claim since a screw is considered a physical structure with a post externally threaded. From the current claim language, the screw could have an engagement portion within (i.e. a hollow screw). It appears that Applicant intends the claim to read: "a cap having a screw which is formed on the cap's inner surface, the screw to be engaged with a screw which is formed on an outer surface of a nozzle of a bottle". While it is preferred to have the claim language changed from "screw" to "screw thread", the applicant may not have support in the specification for such a change.

4. Regarding Claim 1, Lines 5-7 it is unclear how the reverse moving means which is connected to the cap can ascend in a direction opposite to a descending direction.

The specification disclosed at page 5 (as stated in the applicant's arguments) more

clearly identifies how the reverse moving means, rod shaped nut and cap are put together. Some additional language used in the specification should be placed in the claims for a better understanding of the invention.

Response to Arguments

5. Applicant's arguments filed July 28, 2009 have been fully considered but they are not persuasive. See the rejection above for clarification of the rejection and a response to the arguments.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
